Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1, 3-8, 11-15 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The examiner views the added material "second nodes on a distinguishable second layer of the hierarchical network, thereby unknown to the first nodes on the first layer" as being new matter. In the remarks, the applicant states the support for the amendment can be found in the original specification but the examiner disagrees. The cited pages of the specification only cites the physical (Second) nodes of the logical (first) nodes are probably not known by the start (first) node. However, the examiner broadest reasonable interpretation of amended limitations states that none of the first nodes have knowledge of the second nodes. Thus the specification clearly shows the logical nodes are aware of the physical nodes in there sub-network, even if the start nodes is not aware of them. Therefore, the specification lacks support for the amended claims. Since a network node is part of the plurality of network nodes in claim 6, how can the sub-node be unknown to its own network node?

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 13 and 15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims are claiming a computer program product for causing a computer to effect functions of a router or an apparatus. However, a router or an apparatus do not have functions, just structures, only method claims have steps or functions.

Response to Arguments

5. Applicant's arguments with respect to claims 1, 3-8, 11-15 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Sandstrom (US 7,254,138), and Drwiega et al. (US 6,842,463).
